

## **Primrose C9++**

*When conflicts clash - who will suffice?*

### **Mechanics**

- This setup uses a daystart
- Serial killer may choose investigation immunity or 1-shot bulletproof
- Cops are guaranteed to be sane
- Cops get results in the form of "Anti-Town", "Town", or "No Result"
- Trackers get results in the form of who their target visited, "nobody", or "No Result"
- Watchers get results in the form of who visited their target, "nobody", or "No Result"
- Innocent Child is revealed at the start of Day 0
- Doctors prevent one night kill
- Roleblock actions may not be roleblocked
- Kills are indistinguishable
- Mafia Roleblocker cannot kill AND block on the same night
- Mafia Janitor can kill and use their clean action on the same night
- If a Janitor is roleblocked, their clean is not counted as used
- If a Janitor's target does not die, their clean is not counted as used
- A Janitor is not informed about their targets' role after cleaning them
- There is no receipt of system messages from roleblocking or protections

### **Randomisation**

The moderator randomly chooses 9 numbers from 1-100, repeating permitted. Then, each number is turned into a letter as follows:

1-40 = T (Townie. This actually directly influences scum power roles.)

41-50 = W (Watcher)

51-65 = C (Cop)

66-75 = D (Doctor)

76-85 = V (Vigilante)

86-95 = M (Mason)

96-100 = B (Blocker)

The moderator then notes how many of each letter is generated.

### **Setup Determination**

Power roles are inserted into the setup depending on how many of each letter are generated. For example, when looking at the "C" list, look at how many Cs you received. If you get no Cs, do not add any roles from the C list (exception: "T" list has a set of roles to be added if 0 Ts are generated). If you get three Cs, look at where it says CCC and add the corresponding powerroles into the game. In this case, add a Cop and a 1-Shot Cop.
